Hello All! I'm new to the community and to The MU2. I purchased an M model, N143JA. I've met several of you guys through email and private messaging. Thank you all for the help and countless hours of research you saved me from! I'm scheduled for transition training in August. I have 4 children and would like to find a bench seat to use in my plane as an occasional option for when my kids bring friends on our trips. If you guys have one you'd like to sell or know someone who does, please have them contact me!
