Hello all.

I am new to the community. And happy to be part of it!

I'am looking for MU-2 preferably (not mandatory) with short body.

- Good maintenance history
- Fair price
- My missions are of 900 - 1.200 Nm - business & private use - 5-7 pax pilot included.

Fair price: I missed the N228WP fro Ted Dupuis announced @230k\$ with a very good maintenance history. That was a very price I think.

My budget is between 200k - 300k

Please let me know if my desires seems realistic (when I am looking to the adds on controller I am a little worried with the announced prices) and if there is something out of the market ...

Thanks!

Patrick
